

## Kingaroy to Yarraman - The Link Trail

The missing section of trail between the KKRT and BVRT was signposted in 2019. The 55km route uses quiet country roads and an old stock route. Expect this trail to climb and descend, unlike the gradual gradient of the rail trails.

Alternative routes are shown which bypass Nanango. From reports, the route through pine plantation will add more climbing.

Some people love a challenge and have managed to ride 161km from Ipswich to Yarraman, then the 55km link to the 88km Rail Trail from Kingaroy to Kilkivan. That's an eye-watering 304km.

Between towns these routes travel entirely through rural areas without water and few other facilities, and patchy mobile coverage.
